PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building blockchain applications, AI-powered automation tools, and full-stack web platforms. Currently working as a Blockchain Developer at Calip.io and actively contributing to Web3 solutions while pursuing B.Tech in Computer Science. Passionate about scalable backend systems, distributed technologies, and cloud-native software engineering.

EDUCATION

Karnavati University

Gandhinagar, India

Bachelor of Technology (B.Tech.) in Computer Science & Engineering

July 2024 – July 2028

Core Coursework: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems, Systems Architecture.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Solidity, Bash, SQL

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

Blockchain: Ethereum, Solidity, Hardhat, Ganache, IPFS, Web3.js, Ethers.js

AI: Streamlit, YOLO, OpenAI APIs

Cloud & Infrastructure: Amazon Web Services (AWS), Linux System Architecture (RHEL/Ubuntu), IPFS, Docker

Developer Tools: Git, GitHub, PostgreSQL, MongoDB, Postman, Linux CLI

WORK EXPERIENCE

Calip.io

Ahmedabad, India

Blockchain Developer Intern

May 2026 – Present

- Architect and implement robust backend microservices and decentralized interface tools leveraging FastAPI and TypeScript.
- Integrate IPFS protocol modules into server logic to optimize distributed data storage mechanics and ensure verification tracking.
- Collaborate inside development sprints to refactor critical application paths, maintaining codebase compliance with strict clean code principles.
- [Quantified Impact Placement: e.g., Optimized data indexing speeds across API pipelines by X% through automated query tuning.]

GeeksForGeeks (GfG) Campus Body, KU

Gandhinagar, India

Creative Subordinate & Technical Core Member

August 2025 – Present

- Co-organize university-wide technological initiatives, workshops, and competitive challenges targeting an engineering community of 500+ active peers.
- Facilitate cross-functional communications across peer project teams to streamline event platform designs and increase programmatic visibility.
- Structure internal technical documentation and open learning tracks to systematically lower technology adoption barriers for junior batches.

TECHNICAL PROJECTS & RESEARCH

Technical Projects:

- **Blockchain Marketplace** – Smart contract-based marketplace using Solidity and Web3 technologies.
- **Smart Billing AI** – Computer vision billing system using YOLO, Streamlit, and Python.
- **AI Automation Projects** – AI agent and automation workflows using FastAPI and modern APIs.

Research Project:

Secure Defense Data Management Framework

Co-Author | Working Paper

Karnavati University

- Co-designed a secure land-army document coordination system using a hybrid consortium blockchain layer to circumvent single-point infrastructure compromises.
- Engineered off-chain cryptographic file tracking components via InterPlanetary File System (IPFS) peer hashes, verifying integrity validations..

CERTIFICATIONS & COMPETITIONS

- **AWS Academy Graduate** – Cloud Web Application Builder
- **AWS Academy Graduate** – Cloud Foundations
- **Red Hat Academy Certificate (RH104)** – Getting Started with Linux Fundamentals
- **Finalist / Qualifier** – Preliminary Smart India Hackathon (SIH)
- **Participant** – 36-Hour National Level Hackathon Challenge
